### CAREER OBJECT

To gain employment with a company where my experience and knowledge can be contributed , especially in the area of IT fields can be applied effectively . I'm a web developer who enjoys combining creativity with technical skills to bring projects to life. Over time, I've worked on different types of websites and applications, focusing on making them fast, responsive, and easy to use. I believe that every project get an opportunities to learn something new and improve both my design sense and coding abilities.
